PROFILE

Computer Science senior at American University of Sharjah (Spring 2026) with strong programming fundamentals (Java, Python, C++, SQL, Linux). Seeking SWE/AI internships or entry-level roles.

Technical interests: Backend Software Engineering, Applied Machine Learning, Database Systems, Data Modeling, Cloud Development.

EDUCATION

Bachelor of Science in Computer Science

Expected Graduation: Spring 2026

American University of Sharjah (AUS), Sharjah, UAE

PROJECTS

AI-Based Toxic Gas Leak Detection and Evacuation System (Senior Design Project) Sep 2025 – May 2026

- Engineered an end-to-end toxic gas detection pipeline with multimodal inputs (gas sensors + RGB/Thermal cameras) via RT-CAN for real-time risk assessment.
- Generated a hazard/risk map and integrated evacuation routing using D* Lite.
- Coordinated system architecture documentation and cross-module integration within a 4-person team.

Tech: Python, Raspberry Pi 5, Binary Segmentation model, D* Lite

Blood Bank Management System (Object-Oriented Software Engineering Project) Sep 2025

- Created a Java OOP system to manage blood bank workflows including donor records, blood units, and inventory tracking.
- Produced UML documentation (use-case and design diagrams) and aligned implementation with design.
- Authored unit tests for core logic using JUnit.

Tech: Java, UML, JUnit

Smart Inventory & Restock Automation Database (Database Systems Project) Jul 2025

- Developed an Oracle relational schema for inventory tracking (items, storage units, suppliers, orders) with keys and integrity constraints.
- Implemented JDBC CRUD operations with transaction control.
- Constructed analytical SQL queries (joins, subqueries, aggregates) to derive inventory metrics.

Tech: Java, JDBC, Oracle SQL, Relational Modeling

HARD SKILLS

Programming: Python, Java, C++, C, SQL, Assembly, MATLAB

Databases: Oracle SQL, JDBC, MySQL

Machine Learning & Data Mining: scikit-learn, data preprocessing & visualization, PCA, classification & regression (k-NN, Decision Trees, Naïve Bayes, Logistic Regression, SVM), ensemble methods, clustering (k-means, DBSCAN), model evaluation, imbalanced learning

Software Engineering: Object-Oriented Design, UML, design patterns, JUnit Testing, Algorithms & Data Structures, Technical Documentation

Web/Backend: Node.js, JavaScript, REST APIs, HTML/CSS

Systems/Tools: Oracle, Linux/Unix, GitHub, Microsoft Azure, Postman, Wireshark, Visual Studio, Visual Studio Code, Eclipse, PyCharm, WebStorm, Spyder, Cisco Packet Tracer, Arduino

SOFT SKILLS

Analytical reasoning | Communication | Teamwork | Reliability | Leadership | Resilience

LANGUAGES

Arabic (Native) | English (Highly Proficient) | Russian (Proficient)
